SEARCH, EASIER

exalead one:enterprise™ OEM Edition

Need a search engine that combines the simplicity, speed and scalability of Web search with the security, flexibility, and efficiency of enterprise search? Then **exalead one:enterprise OEM Edition** is the solution for you.

exalead one:enterprise OEM Edition is an embeddable search solution designed for ISVs and other OEM solution providers who must fulfill the most stringent performance, availability and scalability requirements, including providers of solutions in markets like:

- ▶ Security, compliance and archiving
- ▶ Enterprise resource planning
- ▶ Business and competitive intelligence
- ▶ Enterprise content management
- ▶ Human resources
- ▶ Publishing

The **exalead one:enterprise** OEM Edition meets and exceeds these high-volume needs with a split-second performance and low-cost scaling no other enterprise search vendor can match. It is also specially architected to accelerate time-to-market, and provides a patented search experience that maximizes user adoption. The OEM Edition further features a flexible licensing and support model that drives revenue while lowering total cost of ownership.

▶ Architected for OEM Deployments

The Exalead OEM solution is designed so you can integrate just the functionality you need, leverage your existing investments, and minimize your total cost of ownership:

- ▶ Provide unified information access with comprehensive search across high-volume sources from the desktop, enterprise, and Web.
- ▶ Drive user adoption and satisfaction with a patented system of serendipitous search that unlocks the hidden value of information.
- ▶ Speed integration and deployment with a comprehensive library of extensible, built-in data source connectors.
- ▶ Provide thorough customization via Web-services-based APIs with synchronous and asynchronous calls for key functions, including search, administration, and push APIs.
- ▶ Minimize hardware investment costs with a lightweight footprint and the ability to index 100 million documents on a single dual-processor server.
- ▶ Accelerate development, maintenance, and support cycle with structured error handling.

KEY BENEFITS

- ▶ Accelerated time to market
- ▶ Rapid user adoption
- ▶ Increased customer satisfaction
- ▶ Lower total cost of ownership

AT A GLANCE

Search Features

exalead one:enterprise OEM Edition offers a fully customizable end user search experience. The baseline interface architecture, which combines the simplicity and intuitiveness of Web search with the efficacy and depth of enterprise search, can be 100% adapted to your application requirements. Out-of-the-box features include:

- ▶ Navigation of results by dynamically-extracted categories, related terms, file type and size, language, author and more
- ▶ At-a-glance scanning of results with content extracts, file type icons and thumbnail images
- ▶ Rich, application-independent content previews with search term highlighting
- ▶ Spelling auto-correction; phonetic and approximate spelling search
- ▶ Advanced search options like boolean syntax and operators, regular expressions
- ▶ Innovative options like advanced image and video search, and audio transcript searching
- ▶ Secure remote access for mobile workers

“a simple, effective, yet sophisticated enterprise-class search engine...[with] a powerful search and classification capability that is performance-optimized and scales infinitely.”

– Rami Schwartz, CEO, Exanet

▶ High Performance and Scalability

Based on the same technical platform as Exalead’s 8 billion-page public search engine, **exalead one:enterprise** OEM Edition is architected to handle large volumes and multiple types of data while preserving indexing speed and query response times, yielding exceptionally high performance and scalability. With **exalead one:search** OEM Edition, you can:

- ▶ Provide true data source flexibility with indexing of 320+ file formats.
- ▶ Ensure unlimited scalability with support for billions of documents and an unlimited number of simultaneous queries.
- ▶ Simplify deployment and meet high volume requirements with support for both 32-bit and 64-bit platforms across major operating systems.
- ▶ Fully exploit the operational efficiencies of modern multi-core processors with a truly multi-threaded application workflow.
- ▶ Reduce by up to a factor of 10 the number of servers typically required in high-end applications via Exalead’s innovative clustering techniques and mathematics-based efficiencies.
- ▶ Enable data consistency and integrity while minimizing maintenance and support costs with log-based crash recovery features.

▶ Multi-Platform Support with Extensible Data Access

Supporting all major operating systems and data format types, **exalead one:enterprise** OEM Edition offers flexibility and investment protection to meet your current and future needs:

- ▶ Optimize applications without constraint with hardware-independence and support for multiple operating systems (i.e., Solaris 64 bit, Linux 32/64 bit, Windows 2000/XP/2003/Vista 32/64 bit).
- ▶ Provide integrated, contextualized views of all relevant information with seamless, secure search across both structured and unstructured data—regardless of data format.
- ▶ Decrease development cycles, simplify integration and keep pace with evolving functional requirements with the ability to access and index standard and non-standard or proprietary file types using out-of-the-box connectors and extensibility tools.
- ▶ Accommodate international clients with out-of-the-box support for 50+ languages.

What our OEM partners have to say about Exalead...

“We work with organizations in the most demanding storage environments, all of whom recognize the need for a simple, effective, yet sophisticated enterprise-class search engine,” said Rami Schwartz, Exanet’s CEO. “Through our new relationship with Exalead, we will offer our customers a solution for one of their critical needs—a powerful search and classification capability that is performance-optimized and scales infinitely to accommodate any enterprise storage environment.”

Rami Schwartz, CEO, Exanet

“Exalead brings an innovative approach to search that enhances and complements our GWArchive solution and will bring even more value to our enterprise customers,” said Pierre Chamberland, CEO of Messaging Architects. “After careful evaluation of several search and retrieval engines, Message Architects decided to select **exalead one:search** due to its superior technology that matches the level of sophistication of GWArchive, as well as the ease of integration with our software.”

Pierre Chamberland, CEO, Messaging Architects

“We work with organizations of all sizes across a variety of industries, from textiles to healthcare to telecommunications, all of whom acknowledge the need for a simple, yet sophisticated search capability to access e-mail at a moment’s notice,” said Ralph Heilig, H&S’s CEO. “By combining the power of Exalead’s unified search technology with our top-quality e-mail archiving and ILM solutions, H&S can offer its customers a secure, unified access point to their information.”

Ralph Heilig, CEO, H&S
